

BizPhone OnCloud Office Phone System

The **BizPhone OnCloud Business PBX** system is an online phone system that provides an affordable alternative to complex hardware systems. Get all of the benefits of a traditional **PBX** – such as voice, auto attendant and extension– without the expense of buying a conventional phone system.

Manage Your Business Phone System

- Create your own virtual office and work from anywhere
- Get a 24/7 Auto Attendant, Call Routing and Voicemail
- Operate like a large, established business without the frills
- Set up in just minutes using your existing desktop and mobile phones

BizPhone is a Hosted IP PBX system for small businesses that uses **state-of-art VOIP technology** ensuring that the quality of your calls are not compromised and keeping it effectively affordable.

The Benefits of OnCloud PBX

1. Operate professional with Enterprise communication solution

Incoming calls can be greeted with professionally recorded auto attendance if you or your team members are not available to pick up the call. Auto attendance will be able to automatically route the caller to right department or person without waiting. Extensions can be routed to mobile phone via call forwarding or voicemail.

2. Improve Productivity and Corporate Image or Branding

BizPhone empowers your business with the features of a large enterprise phone system without the costly hardware, installation and maintenance fees. Incoming calls are automatically answered with a professional greeting and routed to the appropriate person or department in your company. This creates a positive first impression for your business and provides you with instant credibility. A hosted phone system from BizPhone can help increase company productivity and eliminate unnecessary overhead costs or hefty investments.

3. Work from Anywhere

Once you set up your BizPhone virtual PBX, you won't need to stay at your desk to receive calls on your business phone number. Since BizPhone is managed entirely in the cloud you can transfer calls to any number you choose, whether you're at your desk, working from home, or out on the road. No matter where you are when you
